

Simple & Secure File Sharing & Collaboration for your Business

Wizuda Virtual Data Rooms (VDRs) provides your business with a secure online repository for document storage, collaboration and distribution. Built with 'privacy by design', Wizuda VDRs can be set up in minutes, enabling you to manage deals and company projects more productively, without compromising on security or compliance.

Core Features

Feature	Function/Benefit
Simple Setup	Intuitive interface enables users to setup VDRs in minutes.
File Sharing	Share files easily with internal or external parties.
File Uploader	Upload documents fast with the easy to use uploader - simply right click on your mouse and upload directly from your device.
File Downloader	Download your deals or projects with two clicks.
Large File Sizes	With Wizuda VDRs there are no file size restrictions so you can upload files of any size.
All Standard File Types Allowed	This can be defined by the Admin and would exclude any types deemed to be a security risk such as .exe.
File Versioning	Full versioning history on every file is maintained so you can easily revert to a previous version.
Automated Alerts & Notifications	Be notified automatically or selected of all activities within your permissions remit.
Full Search Capability	Search on file names, file content or VDR history.
Full Reporting & Dashboards	Report on all VDR activity through our user friendly reporting suite.

Security & Compliance Features

Feature	Function/Benefit
Two-factor Authentication	Secure all user logins via Wizuda's Two-factor Authentication using a combination of password and a unique app generation code.
Encryption	Wizuda VDRs have an A+ score on sslabs.com. All files are automatically encrypted at rest with AES-256 and use a secure connection and support negotiation up to TLS 1.2 using a prioritized list of ciphers.
Revoke Shared Files	Revoke shared files easily for all or selected users.

Security & Compliance Features *continued...*

Feature	Function/Benefit
File View-only Options	Restrict users from downloading, printing, selecting text or saving files.
Granular Permission Options	Granular permissions levels are available which can be applied to individuals and custom defined groups to meet your security requirements.
Control Where Your Documents Reside	As standard, all data is stored in the Microsoft Europe North Data Centre but can be stored at another specified data centre on request or on premise at the customer site.
Retention Periods	Apply automatic data retention schedules to ensure your organization is keeping data in accordance with its data protection policy.
Black/White Domain Lists	Prevent sensitive data being sent to selected countries or businesses with Wizuda's Domain List management.
Only Allow Users To View Documents From Specific Locations	Options are available to only allow users to access data from specified regions or countries.
Link DPIA to VDRs	For high risk sensitive data, Wizuda has an option to link a DPIA to the VDR upon setup.
Audit Trail Reporting	Full Audit & Compliance reporting is available throughout Wizuda as all activities in each VDR are logged and the history is retained.

About Wizuda

Developing IT Solutions to Make Businesses Better

At Wizuda we focus on developing IT solutions which help businesses grow and empower people to collaborate and stay connected securely and compliantly. Specialists in secure data transfer since 2001, all development and support operations are carried out from our two Irish offices located in Dublin (Wizuda Headquarters) and Limerick. We pride ourselves in developing software solutions that allow organisations to take back control of their file transfer and data sharing operations, enabling them to operate efficiently, securely and compliantly.
